SCIENTISTS

OTHER SEA-BASINS

PUBLIC

POLICY MAKERS

STAKEHOLDERS

We were looking for a general approach to reconnect these missing links in the Black Sea. After fruitful discussions among Young Ambassadors it has become obvious that all the challenges, which the Black Sea is facing, might be united under two main themes.

There are two main themes to deal with:

1. “Ocean engaged citizens and Black Sea Identity”

2. “Multiple Stressors in the Black Sea and Blue Synergy”

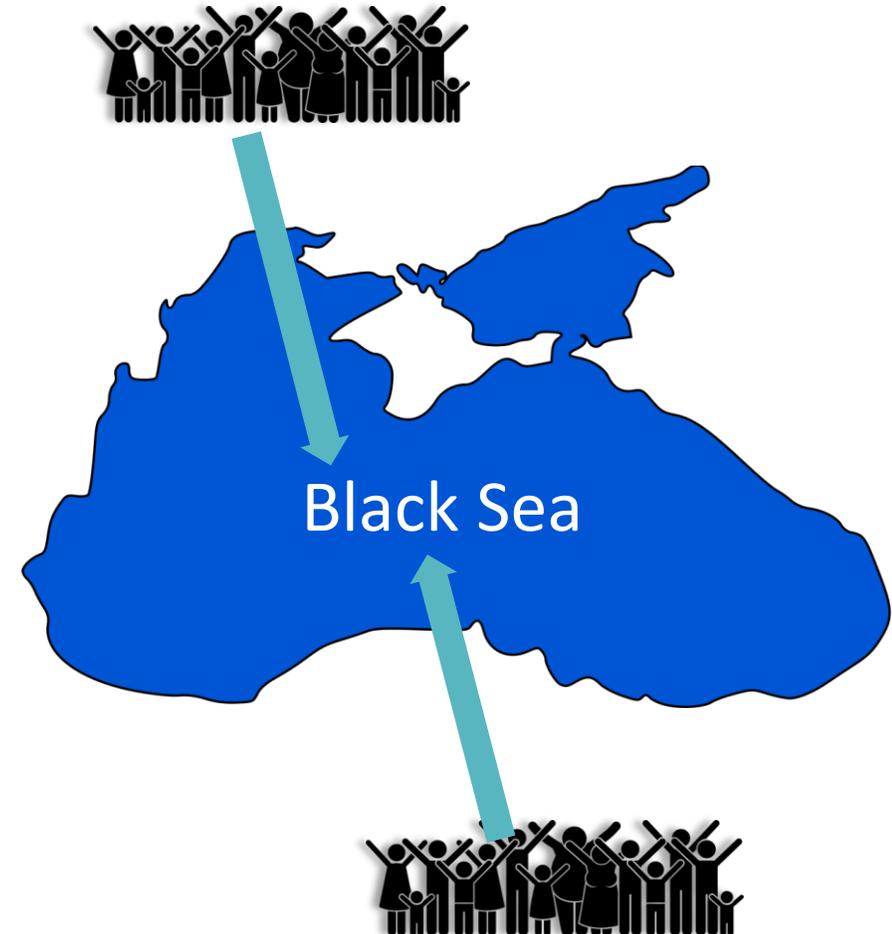

“Ocean engaged citizens and Black Sea Identity”

Missing link 1 “Lack of knowledge on the uniqueness of the Black Sea, its environment and biodiversity”.

- New social media tools for action
- Work with Media
- Educational videos, webinars, photo competitions

Missing link 2 “Disconnection of the Black Sea coastal communities from the sea”

- Empowering people through local campaigns
- Sampling days, clean-ups
- Collect stories of local people

“Multiple Stressors in the Black Sea and Blue Synergy”

Missing link between citizens and science

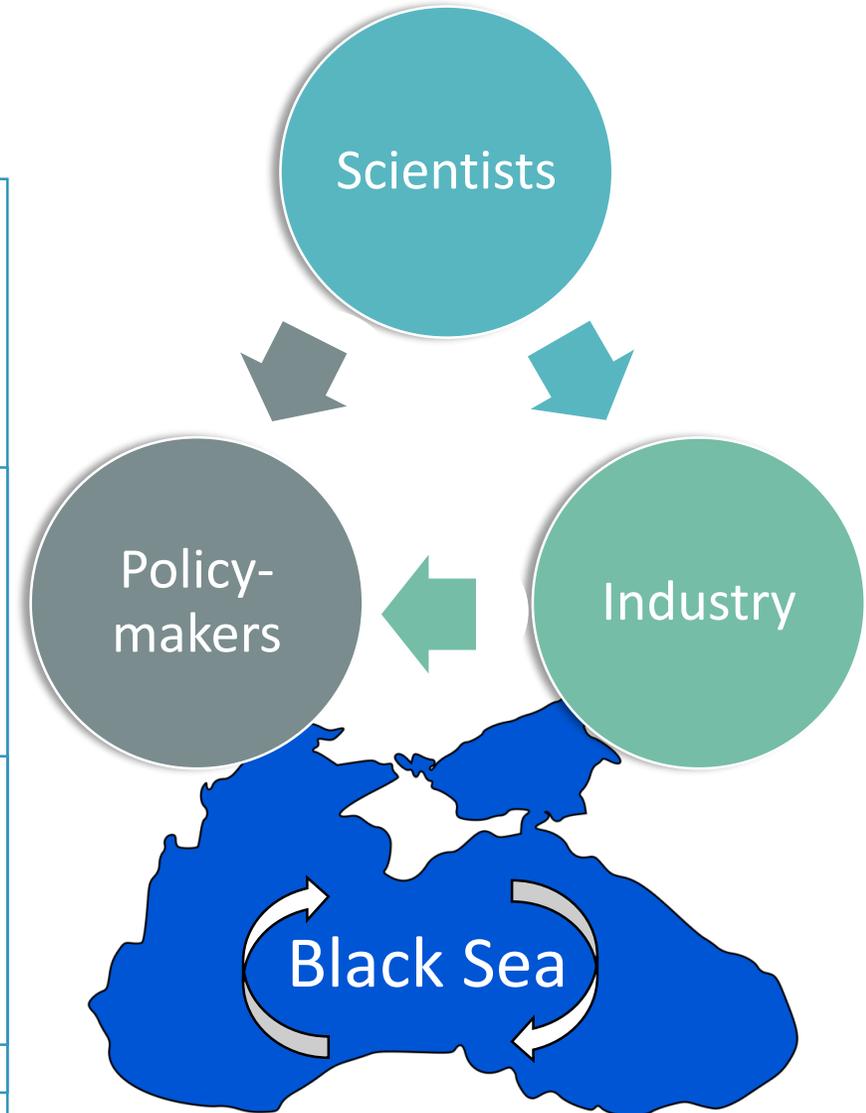

- Involving the citizens in the scientific process
- Campaigns during the World Ocean day, Children’s day, Black Sea day

Missing link between scientists from different countries

- Capacity building trough targeted seed grants
- Empowering young scientists

Missing link between scientists and policy-makers and industry

- Networking events
- Better communication
- Young Ambassadors as links
