SRIA Implementation Plan*

Facilitated under the Black Sea CONNECT CSA, Black Sea SRIA Implementation Plan aims to set the foundational work to protect the unique habitats of the Black Sea while supporting the development of sea-based sectors, which will then boost the blue economy and help generate more employment. It will direct participants from academia, funding organizations, industry, policy, and society to address the fundamental challenges of the Black Sea, promote the blue economy, build vital support systems and innovative research infrastructure, enhance education, and build capacity.

This document is a long-lasting guide to catalyse new ideas and innovations towards and with the Black Sea community and beyond with adjacent regions, actors and instruments for a healthy, resilient and sustainable Black Sea.
